Complete with fold-out carriage.

Power LiftKar HD: 725 lb. high capacity models

■ Three Models

Uni – straight frame – accepts #274102 fold-out wheel carriage for 4-wheel support.

Fold – upper handle angle can be adjusted. Best for copiers, safes, heavy motors or any short and heavy load which would require the user to pull the load back to a very low position for proper balance. The adjustable angle position on the Fold model allows the user to stand upright when using the truck at a very low angle.

Extended Fold – Same advantages as **Fold** but with an extra 7" in height and fold-out wheel carriage.

- Innovative edge-of-step braking system – automatically applies brake when wheels are at edge of step. Helps prevent loss of load control caused by accidental rolling down steps.
- Brake can be shut off for use on level ground – prevents unwanted braking when moving over ground with an uneven surface.
- Two operating modes: single step (ascend or descend button must be pressed after each step – ideal for maximum control), or continuous climb.
- 24v quick-change battery pack – sealed maintenance-free battery.
- Battery, charger and 137" x 2" cargo belt included.
- 21" W x 7.25" D noseplate. Additional sizes available, contact Wesco Customer Service.
- Two climbing speeds: 6 steps/min. or 10 steps/min.
- Average number of steps with fully charged battery:
440 lbs. of cargo - 220 steps
550 lbs. of cargo - 190 steps
725 lbs. of cargo - 120 steps.
- Maximum stair height 8.25".
- 1 year warranty on parts against defects in materials and workmanship.
- 6 month warranty on battery.

Power LiftKar Options

HeviMovers™ are made with precision ground and hardened steel rollers that form an endless chain which revolves around a central load-bearing plate in the frame. Weight of the load is transferred directly from load-bearing plate to rollers. This eliminates axle friction and requires less power to start and move the load. HeviMovers™ roll easily over cracks and pitted floor areas to reduce possible damage to goods.

HeviMover™ Machine Rollers

- Swivel-top for maximum maneuverability, full 360° rotation.
- Spring-loaded locking mechanism at 45° intervals.
- Only periodic cleaning and light re-oiling of roller chain needed.
